Masterfilter SDF-P Series Filter

Pleated Stainless Steel Sintered Cartridge Filter

Masterfilter SDF-P series

The Masterfilter SDF-P series pleated stainless steel composed of stainless steel sintered felt shaped during the pleating process. The stainless steel sintered felt is made from stainless steel fiber, which is then sintered under high temperatures to form the porous depth filtration material. The SDF-P filter cartridges features include a graded pore size from coarse (upstream) to fine (downstream), which results in a higher dirt holding capacity and filtration and filtration efficiency and longer service life. They are widely used in liquid and steam filtration with high viscosities.

Applications

- Steam filtration
- Aggressive chemicals and gases
- Corrosive fluids
- Viscous fluids

Features and Benefits

- Available in 316 stainless steel compatible with aggressive chemicals
- Cartridge can be cleaned and re-used
- Welded construction
- Retrofits for many existing filter cartridges
- · High flow rate
- High temperature resistant and pressure
- · Corrosive and oxidation resistance

Materials of Construction

- · Filter media: Multilayer of stainless steel wire felt, pleated
- Structural components: 100% stainless steel Construction method: Welded adhesives
- End caps: AISI 316
- O-rings: EPDM, Silicone, Viton

Operating Parameters

Max. differential pressure: 5 barg (outside to inside), 2 barg (reverse flow)

Food and Biological Safety

Comply with the relevant requirements of EU 1935/2004 and EU directive 10/2011
